AGN Participates in a Beach Clean Up Organized by Government

On 12th September 2019, PT Armada Gema Nusantara (AGN) sent its local representatives to the beach clean up activity organized by the Branta Harbour Office (KUPP Branta) Indonesia. The activity itself is one of the events organized by the Ministry of Transportation to celebrate the National Transportation Day (Hari Perhubungan Nasional). The event itself is a national-scale event which was held simultaneously at 260 harbors across Indonesia and booked a record-breaking 100,000 participants. It was registered in MURI (Indonesia's museum of records).

This is the second time AGN have participated in beach clean up and with the first being in 2018 where AGN organized the event together with a local elementary school's students and local government representatives. AGN is committed in being a good neighbor where it operates and joining the local communities in improving the environment is one of the ways we can demonstrate our commitment.
