

Bumi Armada Berhad donated desktop PCs to Teach for Malaysia (4th March 2022).

Teach For Malaysia (TFM) is an independent, not-for-profit organisation with the mission to give all children in Malaysia the opportunity to attain an excellent education.

TFM Perkasa Community Program aimed to help students and their families in the Malaysia government's People's Housing Projects and take ownership of their learning journey. The program is currently running with the selected students and their parents in Seri Kota public housing flats.

The beneficiaries of the desktop PCs will be students and families who were selected based on pre-existing relationships with TFM.

TFM program with Seri Kota public housing aims to support the education recovery post-pandemic amongst the low-income communities, by creating a more resilient, sustainable education system and ensure the learners are able to progress with their online education in a conducive environment.

It is a privilege for Bumi Armada to support TFM with its mission.
