

Mangrove Tree Planting at Tanjung Piai National Park, Johor

On the 24th of June, Bumi Armada and Econinja co-organised an Eco-tree Planting programme at Tanjung Piai National Park in Johor. With the help of 30 volunteers, we were able to plant roughly 250 mangrove trees in an effort to restore the environment. On top of this, we also managed to gather 148 kilogrammes of trash within the vicinity of the National Park!
