

Forest & Wildlife Conservation Awareness Programme 2026

On 25th May 2026, in conjunction with the International Day of Forests and World Wildlife Day, Bumi Armada Berhad successfully organised the Forest & Wildlife Conservation Awareness Programme 2026 in collaboration with the Forest Research Institute Malaysia (FRIM).

Through a biodiversity awareness session and a guided nature walk within FRIM's tropical forest ecosystem, participants gained a better understanding of the importance of forest conservation, wildlife protection and the role each of us plays in preserving our natural heritage. The programme also provided a unique opportunity to witness the fascinating crown shyness phenomenon and appreciate the rich biodiversity of Malaysia's forests. The enthusiasm and active participation shown throughout the programme reflected our shared commitment to environmental stewardship and sustainability. This initiative reflects our commitment to environmental stewardship and aligns with the United Nations Sustainable Development Goals (SDGs), particularly SDG 15: Life on Land, SDG 13: Climate Action and SDG 4: Quality Education.
